

# “FIT YOUR FEET IN MOTO” TECHNOLOGY

## PERFECT FIT GUARANTEED IN EVERY SITUATION

### FIT YOUR FEET

When choosing technical motorcycle footwear all bikers pay particular attention to the shape and fit of a boot. To find a motorcycle boot with a correct and comfortable fit, it's essential that it features a fit that is specifically designed for motorcycle use. To satisfy all of the various motorcycle segments in the best possible manner, we have developed a range of different boot widths.

#### STANDARD FIT road

The standard fit is found in all of the racing boots and some of the touring/urban range. Used in Ice, Freccia Dry, Majestic.

#### CASUAL FIT road

Provides total comfort in the sneaker/urban sector. Used in Hyper, Slam Dry, Slam Dry Ladies.

#### COMFORT FIT road

This fit is used in some touring boots and features a slightly wider fit than standard. Used in Horizon, Nero.

#### FEMININE LADY FIT road

An elegant and feminine style featuring a high-heeled sole. Used in Ruby.

#### EXTRA COMFORT FIT road

This is the widest fit in the range, making it ideal for many Kiwis. Used in Cortina Outdry®, Fuji Outdry®, Cape Horn, Adventure, Adv Tourer.

#### EASY LADY FIT road

An easy going and casual boot style with a shorter heel. Used in Eva.

#### URBAN FIT road

A fit optimised for urban/everday usage. Used in Naxos.

#### STANDARD FIT off-road

Ergonomically designed for maximum fit and performance for off-road riding. Used in Predator, Terrain TX, Terrain Evo.
